

MANUFACTURING LICENSE AND SALES & SERVICE REPRESENTATION WITH KANAWHA SCALES & SYSTEMS

QUARRY MINING LLC (QM) has joined hands with KANAWHA Scales & Systems, Inc. USA (KSS) to introduce their range of products in the United Arab Emirates.

KANAWHA Scales & Systems, Inc. USA (KSS) is a leader in the Weighing and Automation Industry in the United States and worldwide. Their major product offering worldwide for the Bulk Handling sector include Batch Weigh Train & Truck loadouts, Scale Data Collections systems, and custom automation solutions.

KSS has implemented over 250 loadout installations in 11 countries on 5 continents!!

Kanawha Scales & Systems has the right loadout configuration for your application. KSS designs your entire loadout from the ground up, engineered to meet your specific needs. Whether your product is coal, iron ore, manganese, salt, phosphate, petroleum coke, aggregate, or other bulk commodities, the components of the loadout are configured to the requirements of your application. KSS application specialists choose the correct type of control gates and shapes of bins to size the loadout system for the desired loading throughput. The loadout and associated control systems are supported remotely throughout the life of the loadout.

KSS offers various software solutions for collecting scale transactions, either through custom solutions to meet the client's specifications or one of their standard software products or even a cloud-based solution if that is what you are looking for. KSS has a solution to meet all your data collection requirements.

THE WORLD LEADER IN TRUCK LOADOUT SYSTEMS

Kanawha Scales and Systems has been the innovator in loadout systems since the late 1970s and continues to develop industry leading batch loadout technology. With the capability of loading any bulk material, Kanawha Scales and Systems has the experience and the technology to design, build, install, and support a custom loadout application world wide.

KSS Truck Loadout Systems are capable of handling all bulk materials including, but not limited to, coal, iron ore, aggregate, manganese, salt, petroleum coke, and phosphate. The material weights generated by our system are legal for trade in the U.S., Australia, China, Mongolia, and India with other countries pending.

- **Ensure safety, accuracy and minimal labor cost** with our unattended, automated truck loadout systems
- **Increase your capacity** with loading rates of 20 - 50 trucks per hour
- **Increase efficiency** with weighing accuracies of +/- 0.05%
- **Maximize production** with simple, reliable, industry proven component designs
- **Become more informed** by utilizing KSS' ReportViewer, the most powerful reporting system in the industry

TRUCK LOADOUT UTILIZING A TRUCK SCALE

Local Manufacturing

American technology made in UAE with German expertise!!

QM shall carry out fabrication of items and assembly with KSS guidance and assistance at its facility in Khor Khwair, Ras AL Khaimah for all supply in U.A.E. Installation and maintenance by QM shall also be offered to interested clients in the United Arab Emirates.

To a promising partnership

The partnership comes at a time when the region is implementing Etihad Rail project that requires a number of bulk material handling solutions such as Train Loadouts and Truck Loadouts. KSS, being a pioneer in the weighing and automation industry and QM, being a home-grown design and manufacturer of bulk handling systems and mineral processing plants, together, are uniquely positioned to offer these state of art solutions in the region.

Quarry Mining LLC (QM) provides engineering, design and fabrication services for the building of industrial structures-such as mineral-processing plants, seaport bulk-handling systems, and environmental technologies in its native United Arab Emirates (UAE), and across the wider Middle East and North Africa (MENA) region. The firm also has experience in the integration of dedusting filter systems and is a pioneer in the supply of downhill conveyor systems with power generation. All the company's steel work is done in the UAE, supported by its 150-strong workforce.
